About Us

Incorporated in 2020, **Ascent Sigmax Sportsmeds Pvt. Ltd.** is an Indo-Japanese joint venture between India's leading consumer healthcare organization **Ascent Meditech Ltd.**, and Japanese multinational **Nippon Sigmax Co.Ltd.**

The joint venture between these two multinationals was formed with a common goal of offering orthopedic support products for the sporting community to prevent injuries.

We are headquartered in Mumbai while our state of the art manufacturing plant located in the Indian state of Gujarat.

"Performance" being the core to any athlete, Ascent Sigmax Sportsmeds Pvt. Ltd., has introduced [GoChamps](#) and [Zamst](#) range of supportive products. [GoChamps](#) supports the aspirational athletes and encourages them to unleash their potential thereby bringing laurels for themselves as well as for their country.

[Zamst](#) is the No.1 brand of Sports Compression Supports in Japan targeting the professional athletes in India.

Push your Limits

Boundaries and barriers are created in the human mind; resulting in fear, self-doubt and low confidence. Consistency in performance is crucial for aspirations to translate into achievements. [GoChamps](#) range of preventive support products understands your intent to remain injury free thereby removing fear and encouraging you to [Push Your Limits](#), thus, improving performance, every time.

Our Uniqueness

GoChamps understands the intense activity, athletes partake and their commitment towards the sporting genre. To support their hard work, top of the line GoChamps preventive support products have been designed with the help of advance Japanese technology and comes with unique features to enable them to perform every-time.

- **Preventive**

Products are meant to be a part of the kit bag. They are essential and should be worn while playing to reap optimum performance

- **Breathable**

Constructed with a specialized material (PUF), which offers breathability to the product thereby helping an athlete to experience a comfortable play or workout

- **Lightweight**

Made with specialized material which is lightweight, durable and offers uniform compression

- **Mobility**

Constructed without any hard stays which allow range of movements as well as offers a comfortable fit

- **Aesthetics**

Sleek in design, trendy and noticeable

- **Latex free**

Not made with natural rubber latex
